

Cyber Security

Cyber Security issues are becoming prevalent and our dependence on IT is increasing. We are here to help protect you from the risks that the modern digital environment faces.

We have expert cyber security auditors who can make sure you are aware of the key IT risks you have and that you know what you can do about them.

What you can get from us:

- Cyber audits with risks and remedial actions identified.
- Specific review of Malware and Ransomware risks.
- Identification of disclosure of information issues.
- Review of inappropriate use of IT resources and internet access.
- Identification of denial of service (issues preventing day to day work).

Our audits are endorsed by the Police Regional Organised Crime Unit.

Services can be provided on either a one off or ongoing basis depending on what you wish. The starting point is to talk with us and we can guide you from there.

Need something else?

We offer a broad range of other professional services in audit, assurance and general business support. All are designed to actively partner with and support our customers with the same philosophy of flexibility, quality and value.

Email us or give us a call – we would be glad to help.
